Question 1

We get all these recommendations about people that can repair garage doors , plumbing, bikes etc. how do we save these to notes on our iPhones. I kind of know how but they are very unorganized.

Question 2

I purchased an iPhone 15 last month. It worked fine at first, but I think I may have changed some setting that now causes it to not access the internet when I'm not on WiFi. Do you know what settings that might be? I have Cellular Data on, and Cellular Data Roaming on.

Apple Maps shows and follows my location, but won't load driving directions, saying "a route can't be shown because of a problem connecting to the server."

Safari says "couldn't open the page because the server stopped responding"

Your help would be greatly appreciated!
